funkwerk D4 Office  
The business handset  
**call>>professional**

The business handset with professional features  
Easy up-grade from D3 and funkwerk FC1  
Universally compatible: GAP and CAP

**Communication and security systems for all public authorities, industries and agencies – with a 40-year track record of success.**

Funkwerk Security Communications has long been the market leader in the field of integrated, professional communication systems for personal security and internal communication applications. Funkwerk systems protect employees and plant by means of reliable communication, precise localization, sophisticated alarm mechanisms and robust, durable hardware with intuitive operation – even under demanding conditions.

Our multidisciplinary experience and an extensive range of technical components and features enable us to provide solutions that are tailor-made to your specific requirements – including telephony, messaging or personal security. We are happy to offer advice without any obligation.

The funkwerk D4 Office places a high-quality business handset at your disposal. It combines comprehensive telephony and messaging features with professional acoustic and signalling functionality as well as superb ergonomics and state of the art technology. Thanks to its GAP/CAP compatibility, it can be used in almost any DECT network.

## **funkwerk D4 Office**

**The business handset for the discerning user**

## *funkwerk D4 Office*

The funkwerk D4 Office is an ideal successor to the D3 mobile and the funktel FC1. In addition to supporting all the well-known features, the SIM card (MemCard) is also backward compatible with the D3 mobile and the FC1: This enables user settings stored on the SIM card to be transferred to the funkwerk D4 Office simply by exchanging cards — without requiring any data conversion, manual reconfiguration or intervention by a technician.

Thanks to state of the art Li-ion battery technology, the D4 offers extended stand-by and talk times combined with longer battery life and shorter recharge times.

The D4 offers professional-quality loudspeaker and hands-free facilities — catering either for an individual user or for the coverage of entire rooms or groups (conference mode).

The casing is light, handy and pleasing to the touch with robust protection against drop and impact damage. In addition to a high-contrast colour display and non-slip keys, the contemporary casing design offers many practical features and user-orientated functions.

In fact, the user interface is based on the tried and trusted ergonomics associated with all funkwerk industrial handsets, combining intuitive handling, unambiguous displays and logical menu navigation for optimal, error-free operation.

## *Highlights:*

- ▶ The ideal successor to the existing D3 mobile or funktel FC1 handsets
- ▶ SIM card of the D3/FC1 can be transferred to a new handset without technical support being required. Login information and telephone directory can be used as before.
- ▶ GAP/CAP compatible: also possible to login without a SIM card
- ▶ State of the art Li-ion battery pack for long standby times and service life
- ▶ High-contrast TFT display with 65.536 colours
- ▶ Easy-to-use keypad
- ▶ 20 MIDI ring tones and 10 signal tones; melodies and volume can be set separately for internal and external calls
- ▶ Suitable for use in noisy environments
- ▶ Muting of all signal tones (with the exception of the alarm messaging function) in favour of vibration, activated by softkey
- ▶ Messaging with manual acknowledgement and priority-driven signalling for unambiguous differentiation between normal and alarm messages
- ▶ Hotkeys for local directory allowing direct access to desired entry
- ▶ Call and received-call lists as well as redial list, each with 20 entries
- ▶ Loudspeaker for hands-free use
- ▶ Manual and automatic keypad lock
- ▶ v function by softkey even on locked handset

## *We offer individual, professional advice.*

Based in Salzgitter, Funkwerk Security Communications GmbH is a leading manufacturer of professional security and communication solutions based on DECT, GSM and TETRA technologies for use in industry, nursing facilities and by public authorities.

We are specialists in personal emergency signal systems and have mature know-how in the development and production of devices for use in explosive atmospheres and which satisfy the requirements of the Employer's Liability Insurance Association in Germany.

As one of the largest producers of personal security systems as well as DECT and TETRA-based handsets for professional and industrial applications, we produce around 250 000 mobile terminals per annum at our facility in Salzgitter.
